SUMMARY

Analytical Data & Business Analyst skilled in **Python, Excel, SQL, and Power BI/Tableau**. Proficient in database querying, data modeling, and data visualization to translate complex datasets into actionable strategic insights. Combines technical competency with strong analytical problem-solving to bridge the gap between technical data and business strategy. Motivated to leverage quantitative analysis to optimize business processes and support data-driven decision-making.

EXPERIENCE

Data Analyst Intern

Bluestock Fintech

April 2026 - May 2026, India

Bluestock Fintech is an Indian fintech startup that provides stock market data, investment insights, and financial analytics solutions to help retail investors and traders make informed decisions.

- Analyzed financial and stock market data to generate actionable insights supporting business decisions at a fintech startup, cleaned and processed datasets using **Python** and **Excel** while assisting the project team under the guidance of the Project Manager, contributed to data reporting and dashboard creation to track key financial metrics and performance indicators, and developed automated data pipelines for real-time financial data ingestion, improving data accuracy and reducing manual processing time.
- Collaborated with product managers to define key performance indicators and design A/B tests for new feature releases, enhancing product strategy.
- Performed quantitative analysis on historical stock performance data to forecast future market trends and inform investment strategies for over a 2-month period.

PROJECT

retail-analysis

Self-directed / Independent Project • github.com/ajaykpai895/retail-analysis • June 2026 - July 2026

- Analyzed 10K+ retail transactions using **SQL**, **Python**, and Tableau to identify \$142K in profit losses from high discounts and loss-making sub-categories, delivering a dashboard with regional and seasonal insights.

TelcoChurn360: End-to-End Churn Prediction & Retention Dashboard

Self-directed / Independent Project • github.com/ajaykpai895/TelcoChurn360-End-to-End-Churn-Prediction-Retention-Dashboard • June 2026 - July 2026

- Analyzed 7,043 customer records across 21 features to uncover churn patterns using **SQL** segmentation and **Python**.
- Achieved 84% ROC-AUC with a logistic regression model, a 6-point improvement over a hand-built **SQL** baseline.
- Quantified \$1.2M+ in annual revenue at risk and produced a live Power BI dashboard for retention decision-making.

EDUCATION

Bachelor of Engineering (B.E) in Computer Science & Design

Canara Engineering College • Mangalore, Karnataka, India • 2027

CERTIFICATIONS

Go Beyond the Numbers: Translate Data into Insights

coursera

- Translated raw data into **insights**
- Designed clear data visualizations
- Communicated complex analytical findings

Data Analytics Essentials

Cisco Networking Academy • 2026

- Demonstrates foundational data analytics skills (data collection, cleaning, transformation, analysis, visualization)
- Hands-on proficiency with industry-standard tools: **Excel**, **SQL**, and Tableau

Data Science Essentials With Python

Cisco Networking Academy • 2026

- Demonstrates practical **Python** skills for data science
- Hands-on with **Pandas**

SKILLS

Technical Skills

- Python (Pandas, NumPy, Matplotlib, Seaborn)
- SQL (MySQL, SQLite)
- Microsoft Excel (Pivot Tables, VLOOKUP, Power Query, Macros)
- Tableau / Power BI / Looker Studio
- Machine Learning Basics (Scikit-learn)
